

## TITLE

### HIGHLY-RESILIENT THERMOPLASTIC ELASTOMER COMPOSITIONS

#### ABSTRACT OF THE DISCLOSURE

5 A thermoplastic composition of (a) an acid copolymer, (b) a  
salt of a high molecular weight, monomeric organic acid; (c) a  
thermoplastic polymer selected from copolyetheresters , elastomeric  
polyolefins, styrene diene block copolymers, elastomeric polyolefins  
, thermoplastic polyurethanes and copolyetheramides; (d) cation source;  
10 and (d) optionally a filler. Also included is use of such compositions in  
components of one-, two- and three-piece golf balls or multi-layered golf  
balls made therefrom.
